Recycle your Car - ATF Network

Be a part of a countrywide ATF Network today and you can meet all your current and future ELV legal obligations with absolute confidence. What's more there is no joining fee and total freedom to use the services of a market leading recycling company whenever you want to.

Recycle Your Car provides a unique service to your customer, from directing them to their nearest ATF via the official web site and dedicated Call Centre, to answering all their ELV questions. As a part of the ATF Network you will also be entitled to a full entry on the web site database and promotion of your business through the Call Centre.

A comprehensive support package is also available to help you meet the increasingly stringent ELV regulations including:

- **documented evidence through the issuing of Recycling Certificates**
- **taking advantage of modern, patented recycling technology**
- **no obligation to sell to the principle recycling company**
- **agreement to purchase de-polluted car shells at market prices**
- **assistance in the disposal of hazardous and recovered materials resulting from the de-pollution process.**

With Recycle Your Car you have nothing to lose but everything to gain so contact us today for details of how to join the growing ATF Network.

www.recycleyourcar.co.uk

The End of Life Vehicles (ELV) Regulations 2005 stipulates that both manufacturers and all non-contracted ATFs are responsible for achieving a re-use, recycling and recovery target of 85%, by weight, by 2006. This target increases to 95% by 2015.

As market leaders, Sims Group has already made substantial investment in post shredder technologies to maximize the recovery of metals and achieve a higher percentage of polymers and other non-metallics from ELVs. Using the same technology as to refine material from waste electrical equipment, its specialised Plastics Recycling Line can now be used for ELV derived plastics & rubber, so enhancing the recyclability and marketability of this material.

Through its global recycling operations, the Group has extensive experience in refining and marketing a range of materials and will continue to provide the highest levels of service to its customers.
